How To **add Design Templates to GarageSale 1.9**(and newer)

Just 3 simple steps

1. The GarageSale User Guide says: *"To make Garagesale find your custom design templates, save them into the directory **~Library/Appliction Support/GarageSale/DesignTemplates** in your home directory. If this directory doesn't exist yet, go ahead and create it. Make sure your template folders are suffixed by a .designTemplate extension."*

2. **Open/ Restart GarageSale** – Now you'll find the new DesignTemplates in the "Design" pop up menu!

3. **Enjoy!** (There is no step 3 ;-)
